

Maryland Soybean Board
Research Priorities
Updated August 11, 2021

There are two areas of research (both are equal in priority):

- Production Research
- Animal Agriculture

Production Research

- Variety development and trials
 - Yield
 - Quality
 - Population
 - Salt-tolerance
 - Yield enhancement products
- Nematodes
 - Race identification and control
 - Resistance
- Weed control (examples: Palmer Amaranth, Ragweed)
 - Low rate chemical usage
 - Herbicide resistance
 - Herbicide trials
- Pest Management (examples: Aphids, Spider Mites, Stink Bugs)
 - Pesticide trials
 - Bio-pest controls
- Drought Management
 - Irrigation
- Cover Crop
- Disease Control (example: Soybean Rust)
- Deer Damage Control

Animal Agriculture

- Aquaculture
- Meal/Oil
