Maryland Soybean Board
Research Priorities
Updated August 10, 2022

There are two areas of research (both are equal in priority):

- Production Research
- Animal Agriculture

Production Research

- Variety development and trials
    - Yield
    - Quality
    - Population
    - Salt-tolerance
    - Yield enhancement products
- Nematodes
    - Race identification and control
    - Resistance
- Weed control (examples: Palmer Amaranth, Ragweed)
    - Low rate chemical usage
    - Herbicide resistance
    - Herbicide trials (including pre-emergence)
- Pest Management (examples: Aphids, Spider Mites, Stink Bugs)
    - Pesticide trials
    - Bio-pest controls
- Drought Management
    - Irrigation
- Cover Crop
- Disease Control (example: Soybean Rust)
- Deer Damage Control

Animal Agriculture

- Aquaculture
- Meal/Oil
